

Data and Privacy File Guides

Apple Media Services: Schoolwork for Teacher

June 2022

File name Teacher.json

File description This file contains data related to the user's Schoolwork Handouts, including data about the handout, and attachments related to the handout. Handouts are the method by which instructors can provide a message to students and enable them to track student progress).

Why Apple keeps this information Apple retains the information in order to display Handouts in Schoolwork, provide a means through which teachers can share information or homework with students, to log the Handout's assignee, and so teachers can save the information for later use with the class.

Field Name	Details
Fields Common Across All Records	Fields used for all record types
App Information	An identifier for the application for which the event was created.
Created by User Reference	An identifier for who created the event
Date Created	The date and time on which the content was created
Last Modified	The date and time on which the object was last modified
Modified by Device Reference	An identifier for the device that modified the event
Modified by User Reference	An identifier for who modified the event
Record ID	An identifier for the progress event
CLSHandout	A message for students that may consist of announcements, reminders, instructions, assigned activities, or requests for work
Due Date	The date and time on which the handout is due
Instructions	A description written by the instructor for the work assigned
Title	The handout's title
CLSHandoutAttachment	Work items defined by an instructor that can be attached to a handout
App Bundle Identifier	An identifier of the application in which the attachment is associated
Context Path	A set of identifiers describing the location of the associated context within the application

Field Name	Details
Content Store Identifier	An identifier used to correlate the associated content with an item in the App Store
Context Summary	The description of the content within the item
Context Type	The kind of content represented by the associated context
Custom Type Name	If the CLSContext "type" field is marked as "Custom", the ClassKit developer can define a name for the type using this field
Handout	A reference to the handout to which the attachment is associated
Item Reference Number	An identifier for the content associated with the attachment
Item Title	The content name, as it appears to users
Permission Type	The permissions given to students on the attachment
Sharing Method	The method by which the attachment is shared with students
Type	The kind of content of an attachment
URL	The URL to the attachment
CLSCollection	Information about the archived classes or about favorites
Archived Class Name	The name of the archived class
Collection Icon	The icon associated with this collection
Collection Type	The type of collection (archive or tag)
Color Associated	The color associated with the collection
CLSCollectionItem	Information that is associated to the handout, archive or the asset within the CLSCollection
Collection Item Type	The type of the collection item
Parent Collection ID	The reference identifier of the parent collection
Reference ID	The reference identifier of the parent handout or handout attachment
CLSFavorite	Item that the instructor has marked as a favorite under sharing options
App Bundle Identifier	An identifier of the application associated with the favorite
App Reference Number	The reference number for the application
Context Path	A set of identifiers describing the location of the favorited context within the application
Content Store Identifier	An identifier used to correlate the associated content with an item in the App Store

Field Name	Details
Context Summary	The description of the content within the item
Custom Type Name	If the CLSContext "type" field is marked as "Custom", the ClassKit developer can define a name for the type using this field
Item Title	The title for the favorited item
Type	The kind of content of a favorite
URL	The URL to the favorite
CLSCKAsset	A multimedia attachment that can be attached to a Handout or Exit Ticket
Attachment File Name	Filename of the attached multimedia asset
